1. HTML & CSS & Javascript Skill Test

   1.1 Please write HTML and CSS code to show the GUI as shown in the following screenshot taken from the desktop

1. 2 Please write HTML, CSS and javascript code to make the GUI from 1.1 to be mobile friendly. As shown in following image, each time only one box will be shown, when clicking the button "NEXT" fixed on the bottom. The shown box will disappear, and the following box will be shown

2. There is a paragraph of text.

"one two two three go go go big small big how sample test text to do it default returns string string is is in seconds since what is the end end"

Please write some code (any language is ok, but prefer PHP) to find out all the words which appear more than once in sequence. The result of the above sample text should be: two two, go go go, string string, is is, end end
